## **Coral IPx 4000 Delivers when Demands are High**

**Tadiran America (Sarasota, FL)** The following except is taken from a review of IP PBXs. To read the entire article please visit <http://www.phoneplusmag.com/articles/511onpremises2.html>.

### **Tadiran Telecom's Coral IPx**

*Tadiran  
Telecom's Coral  
IPx 4000*

Tadiran Telecom's Coral IPx systems meet the needs of small, medium or large businesses and can be used as a traditional switch, a VoIP telephony server or both. Four models include the space-saving Coral IPx 500, the mid-sized IPx 800, the fully scalable IPx 3000 and the IPx 4000 for large enterprises with critical, high-traffic operations.

The Coral IPx 4000 meets the needs of mid- to large-sized businesses with high-traffic/high-performance requirements using a 64-bit processor for higher traffic situations (250,000 BHCA). This non-blocking system has a hot-standby dual-control option, including two complete sets of control hardware, each able to fully and independently control the operations of the entire system. Modular 19-inch expansion shelves are used to house VoIP gateways or traditional TDM interface cards. A fully configured IPx 4000 supports up to 4,224 wired ports.

All Coral IPx models can take advantage of the universal gateway and the media gateway card for trunk- and station-side IP telephony, and remote users will enjoy full Coral functionality using the Coral FlexSet-IP telephone. ACD is a standard feature for distributing incoming calls among 250 active agents in multiple groups. For voice mail and unified messaging, Coral IPx supports the unified Coral Message Center with four to 64 ports for voice, e-mail and fax messaging, or customers can choose the four- to 24-port uCMC (unified Coral Message Center) card that also handles all message types. QSIG networking over IP, frame relay or ISDN among Coral systems is a standard feature.

Sprint resells all versions of the Coral IPx as the Sprint IPx Converged PBX available from Sprint Authorized Dealers. [www.tadiranamerica.com](http://www.tadiranamerica.com)
